CI-100 – Technical Information

CI-100

The CI-100 cash recycling system consists of a banknote recycler (CI-100B) and a coin recycler (CI-100C), offering improved security and reduced cash handling time in retail applications; during day-open, shift change and day-close operations. CI-100 offers the cashier a quick and easy solution for handling cash in the back office of a retail environment, allowing managers more time to focus on their core business. If the compact cash recycling system CI-10 is added, the CI-10 and CI-100 offer a secure closed cash management solution. In addition, the CI-100 accepts not only the interface cassette of the CI-10 but also loose notes from the manual cash drawer. This unique function provides retailers flexibility and extensibility.
